

User Stories & Acceptance Criteria

Product: StudyTrack – Student Task Management App

Author: Shubam Chaudhari | Date: June 10, 2026 |

US-01	User Story
<i>As a student, I want to create an account with my email and password, so that I can securely save and access my tasks from any device.</i>	
Acceptance Criteria	
AC-1	Given a valid email and password (8+ characters), when I submit the registration form, then my account is created and I am redirected to the onboarding screen.
AC-2	Given a duplicate email address, when I submit the registration form, then I receive a clear error message stating the email is already in use.
AC-3	Given a weak password (fewer than 8 characters), when I submit the form, then I receive a clear inline error prompting me to use a stronger password.

US-02	User Story
<i>As a student, I want to log in to my account, so that I can access my tasks and courses across sessions.</i>	
Acceptance Criteria	
AC-1	Given valid credentials, when I submit the login form, then I am authenticated and directed to my task dashboard.
AC-2	Given invalid credentials, when I submit the login form, then I receive a generic error message that does not reveal which field (email or password) was wrong.
AC-3	Given a successful login, when I close and reopen the app within the session window, then I remain logged in without re-entering my credentials.

US-03	User Story
<i>As a student, I want to create a course with a name, color, and term, so that I can organize my tasks by class.</i>	
Acceptance Criteria	
AC-1	Given I am logged in, when I fill in a course name and select a color and term, then the course appears in my course list immediately after saving.
AC-2	Given I leave the course name blank, when I attempt to save, then the form displays a validation error and does not create the course.
AC-3	Given an existing course, when I edit its color or name and save, then the updated information is reflected across all associated tasks.

US-04	User Story
-------	------------

As a student, I want to create a task with a title, due date, course, priority, and effort estimate, so that I can track exactly what needs to be done and when.

Acceptance Criteria

- | | |
|-------------|---|
| AC-1 | Given I am logged in, when I submit a task with at least a title and due date, then the task is saved and appears in the correct view (Today or This Week) based on its due date. |
| AC-2 | Given I omit the due date, when I attempt to save, then the form shows a validation error and the task is not created. |
| AC-3 | Given I attach a task to a course, when I view the weekly workload screen, then the task appears under the correct course label. |

US-05 User Story

As a student, I want to see a 'This Week' view sorted by due date and priority, so that I can immediately know what to focus on.

Acceptance Criteria

- | | |
|-------------|--|
| AC-1 | Given I have tasks due within the current calendar week, when I open the This Week view, then all tasks are displayed sorted first by due date and then by priority. |
| AC-2 | Given I have overdue tasks, when I open the This Week view, then overdue tasks are visually flagged (e.g., red label) and appear at the top of the list. |
| AC-3 | Given I apply a course filter, when the filter is active, then only tasks belonging to that course are displayed in the sorted list. |

US-06 User Story

As a student, I want to mark a task as complete with one tap, so that I can track my progress without friction.

Acceptance Criteria

- | | |
|-------------|--|
| AC-1 | Given an incomplete task, when I tap the completion toggle, then the task is marked complete, a timestamped completion entry is recorded, and the task's visual state updates instantly. |
| AC-2 | Given a completed task, when I tap the completion toggle again, then the completion entry is removed and the task is restored to incomplete. |
| AC-3 | Given I complete a task after its due date, when the completion is recorded, then the system flags it as late in my completion history. |

US-07 User Story

As a student, I want to view a progress dashboard showing tasks completed this week, on-time rate, and my current streak, so that I stay motivated to keep up with my work.

Acceptance Criteria

- | | |
|-------------|--|
| AC-1 | Given I have completed tasks in the current week, when I open the dashboard, then I see the correct count of tasks completed this week and my on-time completion percentage. |
|-------------|--|

AC-2	Given I complete a task on time every day for multiple consecutive days, when I view the dashboard, then my streak counter reflects the correct number of consecutive days.
AC-3	Given I have not completed any tasks today, when the day changes at midnight, then my streak resets to zero and the dashboard updates accordingly.

US-08	User Story
<i>As a student, I want to connect my Google Calendar via OAuth, so that my existing events and deadlines are automatically imported as tasks.</i>	
Acceptance Criteria	
AC-1	Given I initiate the Google Calendar connection, when I complete the OAuth flow, then my upcoming Google Calendar events are imported as tasks and labeled with a 'Google Calendar' source tag.
AC-2	Given my Google Calendar is already connected, when a new event is added to my calendar and the daily refresh runs, then the new event appears as a task without creating duplicates of existing imports.
AC-3	Given I disconnect my Google Calendar, when I choose to remove imported tasks, then all tasks sourced from Google Calendar are deleted; if I choose to keep them, they remain as standalone tasks.

US-09	User Story
<i>As a student, I want to import assignments from Canvas via an iCal feed URL, so that my real academic deadlines appear in StudyTrack automatically.</i>	
Acceptance Criteria	
AC-1	Given I paste a valid Canvas iCal URL, when I save the connection, then all upcoming assignments from the feed are imported as tasks mapped to the correct course.
AC-2	Given the iCal feed is refreshed daily, when Canvas assignments have already been imported, then re-importing does not create duplicate tasks.
AC-3	Given an invalid or unreachable iCal URL, when I attempt to save the connection, then I receive a clear error message and the option to enter the URL again or proceed with manual entry.

US-10	User Story
<i>As a student, I want to edit and delete my own tasks and courses, so that I can keep my task list accurate as my schedule changes.</i>	
Acceptance Criteria	
AC-1	Given I own a task, when I edit its title, due date, or priority and save, then the updated values are reflected immediately in all relevant views.
AC-2	Given I attempt to delete a task or course, when I tap delete, then a confirmation dialog appears before any data is removed.
AC-3	Given I confirm deletion of a course, when the deletion is processed, then the course and all its associated tasks are permanently removed from my account.
